Professional Profile

QA Engineer with more than 10 years of experience in software development and quality assurance, specialized in functional testing, test automation, accessibility, and compliance with international standards. Expert in the design and execution of manual and automated tests, technical audits, risk analysis, and collaboration with development teams to drive continuous improvement of digital products. Digital accessibility specialist under WCAG 2.2 and EN 301 549 standards, ensuring high quality and digital inclusion in products for e-learning, fintech, e-commerce, and government platforms.

Academic Background - Formal Education

2025 **Master's Degree in Project Management**, *National Open and Distance University*.
Focus on management and execution of technology projects

2021 **Specialization in Project Management**, *National Open and Distance University*.
Focus on management, planning, and control of technology projects

2018 **Electronic Engineer**, *Francisco José de Caldas District University*, Bogotá.

Additional Education

2024 **UX Researcher**, *Platzi*, Specialized training composed of 15 courses focused on user experience research (UX Research). Provides key tools to make data-driven decisions and improve end-user interaction with digital products and services.

2024 **Interface Design Specialist**, *Platzi*, Training composed of 6 specialized courses in accessible interface design. Focused on usability, information architecture, interaction patterns, user-centered design, and application of UX/UI best practices to ensure intuitive, inclusive digital experiences aligned with accessibility standards.

2023 **Web Accessibility Specialist**, *Platzi*, Specialized training composed of 18 courses covering from web design fundamentals to advanced accessibility and usability aspects. This training comprehensively promotes the creation of accessible, user-centered digital environments.

2023 **Project Management Specialist**, *"Platzi"*, Specialized training composed of 16 courses focused on practical tools and applications for managing projects efficiently and effectively.

2023 **JavaScript Algorithms and Data Structures**, *"freeCodeCamp"*, Professional Certification, Duration: 300 hours.

2020 **Responsive Web Design Developer**, *"freeCodeCamp"*, Professional certification in design and development of interfaces adaptable to all screen types, Duration: 300 hours.

2020 **Google IT Support**, *Professional IT Support Certificate*, Google, Technical support specialist in computer networks, operating systems, service infrastructure, and information security. Duration: 300 hours.

2018 **Server and IPv6 Network Management**, *"Hurricane - Fremont California"*, International certification for server and network management including IPv4/IPv6 protocols, Duration: 300 hours.

2018 **Full Stack Developer in Hybrid Technologies**, *"Colombian Federation of the Software and Related IT Industry - FEDESOFT"*, Certification in web application design and development, Duration: 100 hours.

Skills

HTML5 CSS JavaScript TypeScript React jQuery WAI-ARIA Bootstrap Tailwind Bulma

QA Engineering & Accessibility, Experience in web application quality assurance through functional testing, regression testing, validation of acceptance criteria, and technical DOM analysis. Specialized in accessibility testing integrated into QA processes, combining automated tools (axe DevTools, ARC Toolkit, IBM Equal Access, Lighthouse, WAVE), technical inspection (Chrome DevTools, accessibility tree and semantic analysis), and manual testing with assistive technologies (NVDA, JAWS, VoiceOver, and TalkBack). Experience documenting defects in a technical and actionable manner, root cause analysis, and collaboration with development teams in remediation processes.

Linux, Python

Automation and Technical Analysis, Use of Python for data processing, support in automation tasks, analysis of test results, and generation of technical reports. Experience working with data structures, QA support scripts, and data visualization tools. GNU/Linux environment as a base for running tools, tests, and technical workflows.

C, C++, Java

Software Engineering and Systems Foundation, Strong foundations in structured and object-oriented programming, understanding of system logic and software architecture, strengthening technical diagnosis capabilities, complex defect analysis, and effective communication for issue resolution with development teams.

Work Experience

Technology Sector

2024 – Present **Digital Accessibility Expert / QA Accessibility Specialist**, *Hiberus*.

Responsible for accessibility evaluation and quality of digital products for international clients (Spain and Germany). Execution of technical audits under WCAG 2.2 and EN 301 549, functional testing, regression testing, and validation of acceptance criteria. DOM analysis, accessibility tree review, and behavior evaluation of interactive components. Technical and actionable defect documentation for development teams. Participation in verification and remediation re-testing processes, ensuring regulatory compliance, usability, and functional stability of solutions.

2024 – 2025 **Web Accessibility Expert / QA Consultant**, *Superintendence of Industry and Commerce – Government of Colombia*.

Contractor responsible for accessibility diagnostics across multiple institutional applications. Technical evaluation according to WCAG 2.2, EN 301 549, and Annex 01 of Resolution 1519 of 2020 (MinTIC). Manual testing, UI component review, validation of keyboard navigation and assistive technologies, identification of compliance risks, and delivery of technical reports with remediation guidelines.

eLearning Sector

2019 – 2024 **Educational Platforms QA Auditor / Accessibility Specialist**, *National Open and Distance University – UNAD*.

Member of the web inclusion and accessibility team and quality auditor of digital educational resources. Evaluation of platforms, LMS, interactive content, and SCORM objects under accessibility and usability standards. Automation of internal processes through web tools to optimize creation and validation workflows. Participation in quality assurance processes for course accreditation and compliance with NTC 6576. Technical incident analysis, template improvement, and support for academic and technical teams in accessibility best practices.

2023 **Web Accessibility Advisor**, *CognosOnline – Office of the Comptroller General Project*.

Training and technical advisory for teams responsible for institutional portals. Knowledge transfer in WCAG, accessibility testing, and accessible development best practices. Website evaluation, identification of critical issues, and support in improvement plans.

2022 – 2023 **IT Professional / QA e-Learning**, *DOKUMA – Creativity and Technology*.

Design, validation, and improvement of educational platforms for government entities in Colombia (MinCIT, MinAmbiente). Quality and accessibility audits on templates and digital content. Identification and remediation of accessibility issues, usability validation, and functional consistency. Technical quality reporting and technopedagogical support to ensure compliance with institutional guidelines.

2022 **IT Education Coordinator**, *Autonomous University of Bucaramanga*.

Technical coordination of the academic closure of the MisiónTIC 2022 software development training program. Supervision of content quality, platforms, and technological resources. Tool evaluation, academic process support, and assurance of accessibility conditions in virtual environments.

2021 **QA e-Learning**, *University of Cundinamarca*.

Technical leadership in development and review of SCORM-packaged digital educational resources. Quality audit before deployment, accessibility and usability validation, LMS integration review, and technical compliance supervision.

Independent

2010 – Present **Software Development – Freelance**, Consulting in software quality and digital accessibility. Execution of WCAG 2.2 audits, functional testing, defect analysis, web interface validation, and collaboration with development teams in remediation. Development of accessible web solutions, automations, and data analysis to optimize digital processes and user experience.

Event Participation

IAW 2023 **6th Seminar on Web Accessibility and Inclusion in Virtual Education** — Bogotá, October 2023. Invited speaker in the "Web Accessibility Experts Panel," presenting success stories, implementation strategies, and best practices in quality assurance and digital accessibility.

IAW 2022 **5th Seminar on Web Accessibility and Inclusion in Virtual Education** — Bogotá, October 2022. Invited speaker with the talk "Projections and challenges in inclusive education: AI and metaverse," focused on technological trends, artificial intelligence, and virtual environments (AR/VR) from an accessibility and user experience perspective.

IAW 2021 **4th Seminar on Web Accessibility and Inclusion in Virtual Education** — Bogotá, November 2021. Invited speaker with the presentation "Best practices in accessible web development," sharing experiences in WCAG implementation and accessibility validation in digital educational environments.

TELEDU 2020 **26th International Congress on Virtual Education** — Bogotá. Invited speaker with the presentation "Technological tools implemented in the UNAD virtual campus for educational inclusion," addressing digital solutions, accessibility, and transformation of educational platforms.

IAW 2020 **3rd Seminar on Web Accessibility and Inclusion in Virtual Education** — Bogotá, October 2020. Invited speaker with the talk "Use of technologies to audit resources for web accessibility," focused on technical evaluation, audit tools, and code-level review.

Publications

2023 **Inclusion and Web Accessibility: Design and Implementation at UNAD**, *Digital Educational Resource*, *UNAD Institutional Repository*. Technical document focused on integrating web accessibility criteria (WCAG) into virtual educational environments, with a universal design approach (UDL).

2022 **Automation Supporting Technopedagogical Course Management in the UNAD Virtual Campus**, *Applied Research Results*, *Presented as a utility model patent*. Technological solution for automation of academic configurations, optimization of technopedagogical processes, and quality standardization in virtual courses.

2020 **Originality Strategy in Virtual Education**, *Book Chapter*, "Fundación Organización Universitaria Interamericana" — MEIN 2020, *Academic publication*. Methodological analysis to promote academic originality in virtual environments through pedagogical strategies and technological support.

Short Courses

2026 **Looker Studio Course**, *Platzi*, Training in data analysis and visualization focused on dashboard creation, metric interpretation, and data-driven decision-making. Applicable to quality tracking, defect metrics, and testing result reporting.

2026 **Claude Code in Action**, *Anthropic*, Course focused on using AI models to assist in software development, code analysis, test generation, and technical productivity improvement. Applied to QA processes, documentation, and defect analysis.

2026 **Prompt Engineering Course**, *Platzi*, Use of prompt engineering techniques to optimize results with language models (ChatGPT, Gemini, Claude), applicable to technical documentation generation, requirement analysis support, test case design, and QA processes.

2025 **Playwright Testing Automation Course**, *Platzi*, End-to-end test automation for web applications using Playwright. Test scenario design, functional validations, UI interaction, selector handling, and execution of automated suites as part of modern QA strategies.

2025 **Professional Git and GitHub Course**, *Platzi*, Version control management, collaborative repository work, branch handling, pull requests, and workflow integration in development and testing projects.

2024 **Video Game Testing Course**, *Platzi*, Fundamentals of testing in interactive environments, defect identification, user experience validation, and software behavior analysis from a QA perspective. Reinforces quality, usability, and systematic failure detection criteria.

2024 **Introduction to Test Automation Course**, *Platzi*, Foundations of test automation: types of automatable tests, test case design, scripting fundamentals, and tool usage to integrate automation into the development lifecycle.

2023 **Moodle Developer**, *Moodle Academy*, Certification in development and customization of Moodle environments, focused on e-learning platform architecture and technical support for digital educational solutions.

2023 **Moodle for Admins**, *Moodle Academy*, Administration of Moodle platforms, feature configuration, user management, and LMS environment maintenance.

2023 **Debugging with Chrome DevTools**, *Platzi*, Advanced use of DevTools for DOM inspection, performance analysis, frontend error detection, and support for technical testing processes.

2023 **Web Optimization**, *Platzi*, Techniques and best practices to improve performance, loading times, and efficiency of web applications, with direct impact on user experience and product quality.

2023 **PDF Management with Adobe Sign**, *Green Know*, Best practices in management, standardization, and professional production of PDF documents, relevant for corporate environments and formal documentation.
